THE MOST VERSATILE GARAGE SCREEN ON THE PLANET

The Garage Door Screen
Specially Designed To Meet the Preferences of
Homeowner Associations
Throughout the United States

Background

1. The Lifestyle Garage Screen Door was introduced to the market, for the very first time ever, in July 2010 – There's Nothing Like It!
2. U.S Patent 8151858, U.S. and foreign patents pending.
3. Voted #1 Hottest New Product at the International Door Association Expo in Las Vegas in Spring 2010
4. Tailored to meet the needs of the modern home and garage
5. Tastefully engineered to appeal to the discerning homeowner
6. Installed entirely in the interior of the garage
7. Operates entirely in the interior of the garage
8. Completely invisible when garage door is closed
9. Assembled and installed by a manufacturer-trained, professional installer

Features

1. In the UP position, the Lifestyle is almost invisible from the outside
2. In the UP position, the Lifestyle is horizontal and directly under the permanent garage door
3. No tracks, frames or casements on the garage door opening to be seen from the outside. 100% of garage door opening is accessible
4. In the DOWN position, the Lifestyle forms a seal against the interior jambs of the garage door opening
5. In the DOWN position the bottom rubber astragal forms a seal with the garage floor to prevent a variety of critters from entering the garage

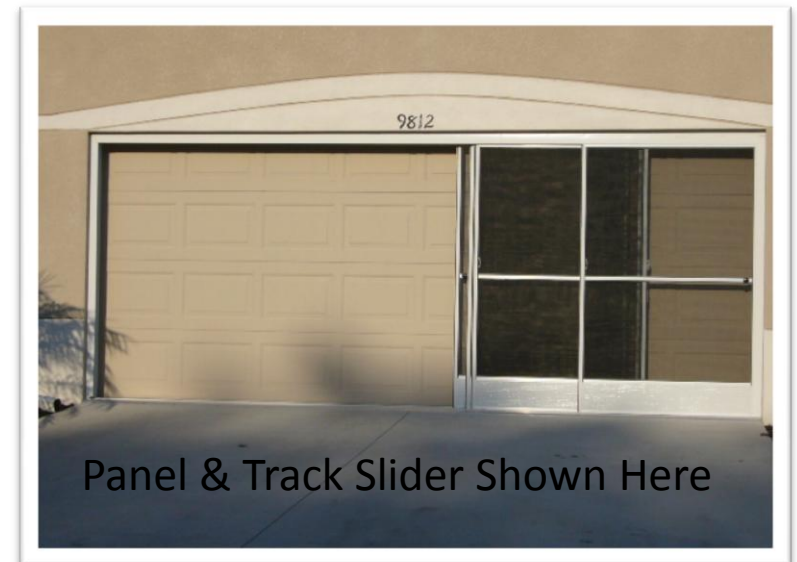

Features

1. Sturdy but lightweight aluminum frame allows for easy manual operation
2. There are no tracks, frames, or additions to be attached to the jambs or the exterior fascia of the garage door opening
3. The retractable passage door in the middle allows for easy entry and exit
4. Screen material allows for a cool and airy garage
5. Privacy screens, solar screens and no-see-um screens are optionally available

Comparison to Panel & Track Sliders

1. Lifestyle has no tracks or casements attached to the frame of the garage opening
2. Panel & Track Sliders have frame and track attached to the frame and floor of the garage door opening
3. Lifestyle is stored out of sight horizontally under the garage door when not in use
4. Panel & Track Sliders are always in view, when in use and when not in use
5. Lifestyle allows for 100% use of garage door opening when not in use
6. Panel & Track Sliders always block a significant portion of the garage door opening
7. Lifestyle has no tracks on the floor to accumulate dust, dirt, twigs and leaves
8. Panel & Track Sliders' bottom track frequently needs to be cleared of dust, dirt, twigs and leaves in order to roll properly

Comparison to Roll-up Electric Screen

1. Lifestyle has no tracks or casements attached to the frame of the garage opening
2. Roll-up Electric Screens have an electric motor casement attached to top horizontal jamb of garage opening usually takes 6"-8 ½" of clearance from the garage opening. Vertical tracks are attached to vertical jambs of the garage opening
3. Lifestyle has a practical retractable passage door for easy entry and exit
4. Roll-up electric screens have no passage door. Entire screen has to be raised in order to enter or exit the garage
5. Lifestyle has no electric motor to malfunction or fail
6. Roll-up electric screens are prone to electric motor failure
7. Changing damaged screen material in the roll-up electric screen is expensive
8. Changing damaged screen material in the Lifestyle is simple
9. Lifestyle is significantly more affordable

Conclusion

Lifestyle Screens is the unquestioned choice for garage door screening for your homeowner association

The proof is there. Homeowner Associations across the United States are already adopting the Lifestyle as the garage door screen of choice

The reasons for choosing the Lifestyle are obvious. The Lifestyle is visually appealing, easy to operate, practical, and affordable
